Groundworks & Bearing

Whole plant factory fabrication

90% power plant factory fabricated across three main factories:

Road transportable factory products taken to site

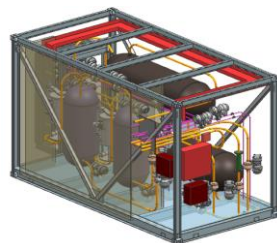

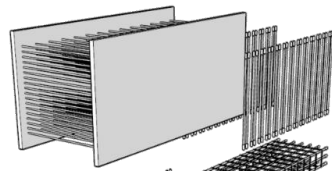

Primary plant

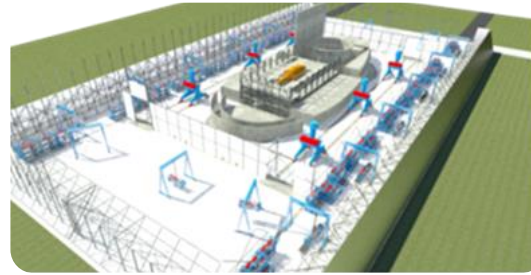

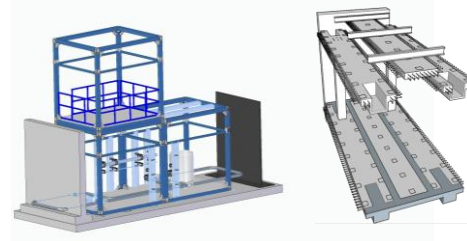

Civil modules

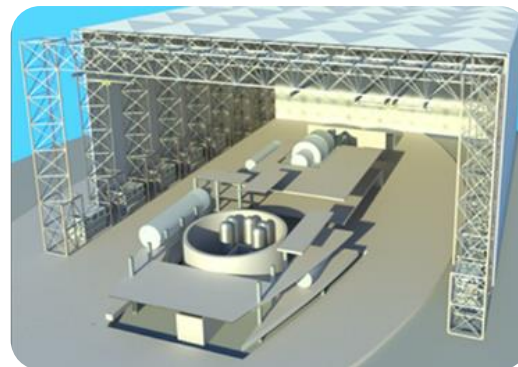

Systems modules

Modules designed to expedite site assembly and installation

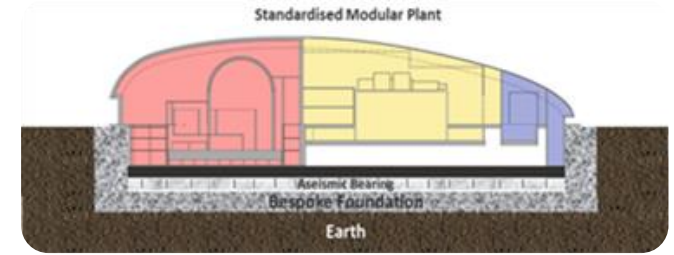

Site factory for build certainty

In a controlled environment under our site canopy / 4th factory to remove risk

Commissioning

Assembly on an aseismic bearing to enable repeatability without cause for site specific redesign

Operation
Low cost power for a Net Zero world

To provide low carbon power in a flexible manner for electrical grid, hydrogen production, or synthetic fuels
